

SERVING PEOPLE ON THE MOVE

ORBCAD PARATRANSIT

Orbital's field-proven Paratransit solution provides service agencies the tools needed to operate a safe, responsive and efficient paratransit system. Our paratransit solution utilizes Orbital's OrbcAD CAD/AVL system, which is flexible, easy to use and highly reliable. Operating cost savings can be realized through the use of private radio communications that are shared with both fixed-route and paratransit services, simplifying equipment inventories and maintenance. Orbital is experienced with integrating to OrbcAD the selected paratransit scheduling vendor of your choice.

Benefits:

- Instant, real-time manifest updates to the vehicle
- Automatic reordering of work schedules
- Canned data messages reduce voice calls and improve overall response times
- Large, easy to view display screens
- Common CAD/AVL system and on-board Mobile Data Terminals for both paratransit and fixed-route fleets
- Cancellations are communicated instantly eliminating wasted miles and minutes
